

LIFE TERRACESCAPE Final Conference, 30 June 2022

The Conference, to be held in the frame of the project LIFE TERRACESCAPE (LIFE16 CCA/GR/000050, <http://www.lifeterracescape.aegean.gr/>) aims at informing local and national authorities about the achievements of the project (2017-2022). The coordinating team, namely the University of the Aegean, together with representatives of the five project partners (Green Fund, Municipality of Andros, National and Kapodistrian University of Athens, National Observatory of Athens, and Hellenic Agricultural Organization-Demeter) will uncover the positives to be further transferred to the society and discuss the challenges of a very ambitious project!
