

## COURSE OUTLINE

### (1) General

<b>School:</b>	Social Sciences		
<b>Academic Unit:</b>	Geography		
<b>Level of studies</b>	Undergraduate		
<b>Course Code:</b>	GEO 231	<b>Semester:</b>	D
<b>Course Title:</b>	Urban Analysis		
<b>Independent Teaching Activities</b>	<b>Weekly Teaching Hours</b>	<b>Credits</b>	
Lecture		3	
		<b>Course total</b>	5
<b>Course Type:</b>	Required Elective		
<b>Prerequisite Courses:</b>	None		
<b>Language of Instruction and Examinations</b>	Greek		
<b>Is the course offered to Erasmus students:</b>	No		
<b>Course Website (Url):</b>	<a href="https://geography.aegean.gr/pps/index_en.php?content=0&amp;lesson=231">https://geography.aegean.gr/pps/index_en.php?content=0&amp;lesson=231</a>		

### (2) Learning Outcomes

#### Learning Outcomes

Upon successful completion of this subject, students :

- Will have familiarization with the basic concepts and definitions of Urban Analysis.
- Understanding Urban Analysis specific objectives, theories and practices.
- Analyze several cities with quantitative, qualitative and urban descriptive methods.
- Cultivation of the ability to interpret the contemporary structure of different scales of cities in different spaces and times and how cities have changed
- Critical approach of urban (social, ecological, cultural and economic) phenomena
- Identify a variety of approaches of urban analysis
- Be able to integrate knowledge with critical thinking skills
- Be able to use various geo-spatial tools in urban analysis
- Be able to learn the composition of a trans-disciplinary project of urban space
- Cultivation of team work ability and collaboration spirit
- Will have improved their capacity to translate this knowledge into applied analysis
- Will have gathered and created new information about urban conditions and
- Will have improved their communication skills in public presentation about their own research project and findings.

#### General Competences

1. Search for, analysis and synthesis of data and information, with the use of the necessary technology

2. Adapting to new situations
3. Decision-making
4. Team work
5. Working in an interdisciplinary environment
6. Production of new research ideas
7. Respect for difference and multiculturalism
8. Respect for the natural environment
9. Showing social, professional and ethical responsibility and sensitivity to gender issues
10. Criticism and self-criticism
11. Production of free, creative and inductive thinking

### (3) Syllabus

This module introduces students to some of the most known key themes, concepts and debates characterising Urban Analysis in several schools of Geography and in critical transdisciplinary approaches. Among the topics covered initially are: human geography debates and theories of urbanization; urban analysis with quantitative, qualitative and urban descriptive methods; interactions between urban phenomena and environment, spatial planning and politics in several cities and particularly in the cities of Athens and Salonica.

Spatial exclusion: social, economic, environmental and cultural issues. Gender issues and anti-colonial approaches in Urban Geography.

Various geo-spatial tools such as Quantitative Analysis software Geographical Informational Systems, Remote Sensing and Urban Modeling are been utilized and combined with Qualitative Methods, to understand urban spatial processes.

### (4) Teaching and Learning Methods - Evaluation

<b>Delivery:</b>	face-to-face	
<b>Use of Information and Communication Technology:</b>	Yes, Bibliography, GIS, Remote Sensing.	
<b>Teaching Methods:</b>	<b>Activity</b>	<b>Semester workload</b>
	Lecture	27
	Project	45
	Laboratory practice	12
	Fieldwork	18
	Non-supervised study	13
	Performance evaluation/Exams	15
	<b>Course total&lt;</b>	<b>130</b>
<b>Student Performance Evaluation</b>	50% dissertation 50% exams
