

Sofia Zafeirelli is a geographer and GIS researcher specializing in spatial and spatio-temporal data analysis, smart cities, environmental monitoring, and geoinformatics. She holds a BSc and a MSc in Geography and Applied Geoinformatics, as well as a PhD in Geography from the University of the Aegean, where her doctoral research focused on spatio-temporal data analysis methodologies for decision support in smart city applications.

Her research interests include spatial analysis, remote sensing, environmental sensing, urban studies, and precision agriculture. She has participated in several international research collaborations and Erasmus mobilities. Sofia has authored and co-authored numerous peer-reviewed publications and conference papers in the fields of GIS, smart cities, environmental monitoring, and spatial data science. She is also actively involved in national and international research projects related to geospatial technologies, environmental sustainability, and spatial planning.
